

**Editorial**
**Vol -1, No-I, 30 Nov 24, 9 pages**

Now at least you must have the firm belief that everything in managed whether it was margin issue or adani issue or m f issue or any other issue. Classic example is multibase rose more than 100% and no regulations were applied. It had 3 20% upper circuit which is a unique case. How is that possible you can understand? We come to know only because multibase was under active tracking. This must be happening in many stocks. In stocks like Global Offshore esm triggered even at 25% rise which was not the case with multibase. It could mean some drivers have soft corner.

Sebi Chairperson said that there is froth in f and o. F M also said there is froth. Market crashed by Nifty 3200 points and now we are seeing 45 new scripts coming in F and O. Certainly there is no regulation in place for bringing in and moving out which can kill any big investor overnight. Three months' notice for exit is not sufficient time and 30 days entry is also not difficult time in my view though policy makers must be having strong rationale forgoing this. It is all in the hands of Narendra Modi to make SBI 15 lac crs co by announcing 49% limit to FPI. Sbi is the national bank of India and true representative of India as RBI is only central bank.

This Is where I always tell you not to indulge in f and o. From 29th Nov Nifty lot size is becoming 75 shares 3x. So be careful as volatility can take your wicket. At the same time with 75% retail exiting it could be exciting and easy

Alternative strategy to f and o for f and o traders is take f and o stocks in delivery or margin in smaller quantity so that your exposure is under control.

Market has bottomed out yet volatility will persist for next 4 days due to expiry considerations. If Fpi decide to cut their 2 lac short contracts and go long Nifty will be 25000 + easily. Election results will add fuel to fire. But for God's sake do not ride at 24000+ or around for next 4 days. If shorts not cut and they decide to hold they may try to hit hard again till expiry. Do not buy in gap up else you will get trapped. No question of profit booking as no one bought at low except Tata motors call of Dec 740 at 56 where try to book profit if cross 75 80 which I believe.

**Change of the week**

	30-Nov-24	Rise /Gain
Sensex	79802	694 
Nifty	24131	226 

**Net Investments ( ` Cr)**

	FII	DII
25-Nov-2024	9947.5	5723.3
26-Nov-2024	1157.7	8718.3
27-Nov-2024	7.7	1301.9
28-Nov-2024	(11756.2)	(1910.8)
29-Nov-2024	(4383.5)	(6907.9)
<b>Total</b>	<b>(5029)</b>	<b>6925</b>

**Turnover ( ` Cr)**

	FII	DII	Combined
<b>29-Nov-24</b>	<b>2,74688</b>	<b>1,31,368</b>	<b>4,06,056</b>

29-Nov-24	Advances	Declines	Ratio
BSE	2347	1606	1.46

But if you take 2 months view 26000 26600 is distinct possibility. There were 4 occasions in last 30 years when Oct and Nov have seen major corrections. In all the four occasions Dec saw meaningful rally and this time it should not be different. Consider this a heavily suppressed spring which will bounce heaviest when spring is released. Generate self-belief now not at peak. Buy stocks at pe less than 15 so that you always remain in safe zone. If banking in one liking then SBI is Hobson's choice is Sbi Earned 72000 crs whereas Ril 80000 crs Sbi trade at 6 lac crs whereas Ril at 16 lac crs.

On Friday fpi cut 20% short and to cut short they sold 1200 crs in cash also and Sensex was up 2000 point. Balance 80% cutting where would Sensex go is you to decide. Effective short reduction was though only by 10%. Bjp won Maha with big margin there remains no alternative to fpi with their 80% shorts. Rsi has improved a bit to 44 yet far far away from overbought state.

How things change overnight one should learn from following story. SAIL, Rourkela Steel Plant (RSP) has entered into a long-term agreement with Adani Enterprises Limited (AEL) for the development and operation of the Taldih Iron Mine.

The project, based on the Mines Developer and Operator (MDO) model, will expand the mine's production capacity from the current 2 million tonnes per annum (MTPA) to 7 MTPA. 5 mn tons extra iron ore means 45000 crs additional revenue. Now SAIL and NMDC production will be equal. How long operators will suppress SAIL. ?

Next bold reforms will start now as R S majority of Bjp Will rise. If you trust me try to focus on following stocks whether corrected or not which offer decent opportunity of doubling you money in quickest possible time

Investment Precision (read chairman speech) (defense emphasized)  
Forbes Ltd (corrected with the wind)

Kpt (e v biz and kirloskar gr backed by strong earnings) ( bonus candidate due to small equity base)

Niles (earnings exploding with higher capacity)

Bbtc (Britannia deal is yet to be out) (still trade at 25% discount for fair value)

Global offshore (recouping lost glory of 2015) (vessels count could be 7 to 17 in 12 to 18 months)

5 Top Gainers			
Stock	29-11-2024	25-11-2024	% Gain

INTEGRA ENGINEERING	

We do not claim credits. We are here to serve you irrespective of the fact you own trades will decide your fate. If you in excess gambling and lose money you will try to blame others and then why not CNI. But if look at the current prices of SBI HDFC RIL and our call initiation prices you will realize our mechanism, timing of averaging and finally exiting in profit. We could have given exit in HDFC at 1897 and shown profit but we feel best is yet to come and HDFC game is just started. ENAM RKD CLSA and all big guns have added more than Rs 60000 crs worth HDFC which will decide the trend not CNI. CNI just reads the data.

We do not have to prove again and again. We started in GLOBAL offshore at Rs 22 and we had seen many highs and lows but those who trusted CNI is now enjoying at Rs 118 upper cct. Tomorrow it will cross 52 week high. Trust me this stock will not only show 4 digit but may do Rs 2500 to 3000 to match Semec valuations as it will have 17 vessels whereas Seamec has only 4. We have detailed presentation on this co where we have details of each vessel and their probable earnings and estimated profit in March 26 but we have decided not to share with retail members as instead of appreciating some members try to blame us. Yet we will share on whatsapp with only those members who have yearly subscription that too on request.

BJP we had said 175 and it is 234. No one even believed us for 175. We had shared FPI short RSI data and our view. Anyways we did our job and tried to protect all CNI members and now elections are over. Reforms will start. I had mentioned we may see surprise rate cut which will take Nifty to 26600 in next 60 to 90 days. Why ..

India is anticipating a record-breaking Kharif harvest (Kharif season: July to October), which is expected to lead to a substantial decrease in food inflation rates. A bumper harvest means that the crop yield will be higher than usual, resulting in an abundance of food grains.

In simpler terms:

India is expecting a great harvest season, which will lead to a surplus of food grains.

This surplus will likely cause food prices to drop, which in turn will lower food inflation rates.

Here's how it works:

Higher crop yield → Surplus of food grains → Lower food prices → Lower food inflation rates

A bumper Kharif harvest will have a positive impact on the economy and consumers, as it will:

Increase food availability

Reduce food prices

Lower food inflation rates

Support economic growth

Overall, a great harvest season is expected to bring relief to consumers and the economy, making food more affordable and helping to control inflation.

Hence early rate cut. FM PM and even RBI itself is batting for rate cut. Rate cut will spark all PSB and PSU very fast.

Another important decision which will come up before parliament is that PSU will have to pay minimum dividend. Why..? In Budget 2024 FM has estimated Rs 2.90 lac crs dividend as against Rs 1.7 lac crs earlier. Now this will come through policy changes and next year may see Rs 3.5 to 4 lac crs. With this 2.90 lac crs the yield has become 6.6% and with this yield next 4 months PSU will see massive rally.

Also PSU will report massive growth in Q3 and Q4 as Rs 11 lac crs Govt spending is about to start. As per PM directives first priority goes to PSU stocks hence maximum benefit will go to PSU. This too will boost PSU stocks.

I had mentioned that please do not take head on Govt as far as PSU are concerned as they are coming seen and we are blind. In Bhel they got announced that BHEL will execute 9 GW orders in 25-26 which means nothing less than Rs 70000 crs.

Current revenue is Rs 26000 crs. Now imagine 300% rise in revenue and 1000% rise in profits. These orders were procured with 11% margin means Bhel will have by default a profit of rs 7700 crs leaving aside other profits. Even if 50% is delivered then also BHEL has to be in 4 digits in next 15 months.

Same way Govt played master card with SAIL. SAIL signed agreement with ADANI for 7 mn tons extraction of iron ore. The average price of ore is Rs 5600 for 61 FE and Rs 7500 for 67 FE so I take lower price of Rs 5600 which will give Rs 39000 crs ore to SAIL. Minus cost of say Rs 2000 per ton yet the profit will be rs 25000 crs. Current profits are already Rs 25000 crs means SAIL will have Rs 50000 crs operating profit on equity of just Rs 4000 crs. We generally value 10x of operating profits and given current under valuations also that is 2.5 times then also SAIL has to be valued nothing less than Rs 1.25 lac crs. Slowly valuations will catch, merger of steel will come, demerger of ore and land bank etc etc should take SAIL to Rs 6 lac crs valuation however efforts will be made to grab SAIL at 50000 crs or suppress the price.

WHY SHETRON to become multi bagger

Finally Shetron a gem of the packaging co selected by CNI team has hit the roof and hit 52 week high even though the market cap remained just at Rs 150 crs which is nothing for a co like SHETRON. They have a gr company namely Fibrefoils ltd. They have another gr company Sansa Systems which will deal later. See the link below.

<https://www.fibrefoils.com/>

Paper is stronger and more versatile than most of us think. We at Fibre Foils leverage the power of foiling and more to create innovative packaging, storage and industrial solutions using paper that is strong, durable and is custom made to suit the needs of our clients.

Fibre Foils Technology manufactures Composite Cans, Fibre Drums, Paper Cores, Textile Tubes and Film Cores. Products are of international standards available in a wide range of sizes and types to meet the ever changing needs of customers.

With world class manufacturing facilities, at Khopoli in Maharashtra State, Bhiwadi in Rajasthan state and Bangalore in Karnataka State, Fibre Foils offers products of international standards, in a wide range of sizes and types to meet the requirements of various industries. This multi-location aspect provides unique benefits in terms of accessibility, efficiency and transportation costs to companies whose production plants and markets exist across the nation.

Now SHETRON has 1 unit at Bangalore next to SKF which is huge. You can this from their website. However Fiber Foil has 4 units which are as under

Khopoli Plant Unit 1:

Khopoli Plant Unit 2:

Bengaluru Plant

Bhiwadi Rajasthan Plant

Both these companies are merging sure as per the pre-condition for US Company to strike a deal. This is unofficially confirmed by insiders.

Merged co will have revenue of Rs 600 to 800 crs and 5 plants in place. There is no possibility of putting a plant at Rs 200 crs now a days. Hence We feel the combined value 5 plants put together should not be less than Rs 1200 to 1500 crs.

We are getting SHETRON at just Rs 150 crs and this is listed entity which will benefit. If this has to be merged in unlisted then there has to be open offer which promoters will not do hence unlisted co will merge in listed.

Two US companies are on hook out. Ball Corporation 21 bn \$ size and Crown Holdings 11 bn \$ size. We do not know which one will strike the deal and when.

Why US companies mentioned openly in their report about SHETRON..? They feel without TIN semiconductor cannot be developed and INDIA is becoming semiconductor hub. They have also mentioned the importance of CHIP will rise so much

that every weapon used in WW III will be chip based. We may see many Indian companies also chasing SHETRON and HINDUSTAN TIN for this reason alone.

Our job is to give rationale rest is your call. We know everyone has by far sold SHETRON else it could not have hit new high.

But SHETRON will give us good returns for sure. We spotted this co well below 100 and now it is at 52 week high irrespective of markets and hence CNI will keep advocating that buy cash stocks to create wealth even though we will work at 100% strike rate even in f and o but as told discipline is required. I can take horse to water but can't make horse to drink it.

Even before taking big bets in f and o you could have consulted us we could have told you how much risk you should take.

I love to see sell on rally slogan which will change after 24500. Next 2 days can't comment on market as they fully depend on call and put income.

As of yesterday FPI were short at 1.08 lac down from 2. Lacs + means it is proven that 1 lac contracts short casted then 3000 Sensex. Now another 1 lacs contracts could easily be the case of another 1000 points Sensex at least.

They got the size because PRO started squaring off with retail ahead of expiry seeing sharp bounce and fear of correction again.

After Thursday no one will talk bearish. Above 24500 they will cut short till 25500 and 26000 also and building fresh positions means 26600.

What we learnt is to buy cash stocks and enjoy the rally. GLOBAL now became Rs 123 and giving exit to all who desired to exit.

Same thing has happened in AK and Ashnoor.

Now time to do with INTEGRA, VIPUL, RDB RASAYAN, HIND TIN Shetron, Emmbi and M K. wait and watch Have written detailed note on SHETRON but this will never impress retail. They need jockey and if they get a jockey they will buy even at 100 PE or even a fraud co.

At CNI we do not advocate such companies. We want ARIHANT, AK SPINTEX, CERA and kinds of shares. Regret has become a normal culture which we do not want to advocate. Hence buy all stocks and hold and sell 50% at 100% rise and rest transfer to free account. We have Arihant We have Global We have Unique Organics we have AK we have ashnoor we have loyal equipment and what not but all in free account.

Wed FPI shorted Nifty say 20 lac contract and kept market under control and bought in Cash. Today is the last day for short covering so let see how markets pans it away. FPI sh0rtd another 15 lac contract to reach 1.35 lac contracts. This is to misled markets and cutting shorts in stocks in a big way.

SAIL BHEL TAMO SBI and TAMO are highest short counters hence should rise 10 to 20% in Dec.

Now market will realize the potential of BHEL and SAIL.

24500 bears tipping point and Dec is at 24500 rest you to understand. Market reaction we will see on Monday.

HDFC bank crossed 1800 in style and now will go all the way to Rs 2700. All free floats which was accumulated from 1400 to 1700 have changed hands that is 18.90 cr shares in MSCI action. Now fresh accumulation started.

<https://timesofindia.indiatimes.com/india/russia-eyes-india-as-hub-for-train-manufacturing/articleshow/115710366.cms>

Hence I feel Integra has bright future. Keep watch on it. Now settled at R 250 post results and I am waiting for it to cross Rs 330.

Not writing too much on cash stocks as you do not have money to buy so there is no point.

FPI shorts reduced to 1.18 lac contracts and yesterday market fell 1100 points but none of the stocks got affected. You know how markets are manipulated.... Infosys, M and m, Hcl tech, Tcs, Titan, Adani ports Bajaj fin, Kotak bank were kept low which no one has interest except INSTI investors. Index was manipulated as can be seen whereas Mid-caps and small caps were in action suggesting big rally going forward. This was V WAP selling and nothing negative should be read out of it.

Tom they may pull 1500 Sensex, Bhel, Sail, Tapo, Tamo, Hdfc Bank and Sbi will steal the limelight. These stocks did not fall yesterday.

So logic is clear attack stocks which are not owned knowing that these stocks will also bounce back after some time and attention gets diverted. Those who does not understand markets will always talk about the Indices.

RIBA filed till Rs 97 giving price and volume break out. Let us see when it cross Rs 125. Bangala Desh crisis has opened the fortunes of this co as mostly beach towels were exported from Bangala Desh to USA and Europe. Now this is going from RIBA and management confirmed this on call. We may see RIBA profit doubling in Q3 though it tripled in Q2. Those who are keep to enjoy a long term bet on terry towels should keep this stock on radar as we were told even WALMART has asked big QTY of beach and terry towels. It is up to you.

Multi baggers are never made in days of weeks or months. See GLOBAL OFFSHORE where who's who have started buying even at Rs 134 when there was no takers at Rs 40. We started at Rs 22 and now Rs 136 (6x) and it is just the beginning. Those who lose sight and sell sensing big profits will regret for the entire life as I feel this stock could be bigger than SEAMEC as co is planning to have 17 vessels.

Why I am repeating this again and again is for simple reason. Operators always squeeze you by hitting 1 upper and 2 lower and bring it down by 20% and when it starts rising you sell it. Eg RDB RASAYAN it hit Rs 205 all-time high and then corrected to Rs 163 and yesterday reversed and closed at Rs 175 and everyone started selling. Once this cross Rs 205 then it will be Rs 550 for sure. Then 700 1000 etc. Because there is no big outside holding and co earns Rs 40 crs net profit very rarely you can see this kind of profit even in A gr companies.

With promoters holding 83% and smart investors 10% what is left is just 7%. Any one HNI will tomorrow stand up and drive the price to Rs 1000 and you will cry. This is a written story in many stocks. I was told packaging is the next sector on the radar of big HNI investors. So all packaging companies will blast come what it may.

Shetron

Hindustan Tin

Emmbi

Rdb Rasayan

Hitech Corporation

And

National Plastics Technology.

Shetron post merger of fober foil will have 5 plants at 150 crs.

EMMBI is world class exporter of FIBP bags.

Hindustan TIN will be the largest beneficiary of semiconductor

Hitech Corporation ONLY Asian Paints name is enough

National Plastic Technology is next Wimplast

RDB Rasayan belong to Rs 25000 crs GROUP

## Special feature

I do not know where all chartists have evaporated which were advocating a big crash till 22300 21000. Chart is so beautiful it sees lower low and higher high which makes you stuck at the peak and get trapped at the bottom. We confronted with some bears in open forum at 19000 Nifty with jam pack capacity of 8800 web participants where they were saying markets will crash 70% but market went up by 39%. Charts are manipulated that is why every chartist which knows CNI calls us before taking personal positions.

We had mentioned through Chakry comments that markets may see further attacks till Thursday and it is seen. Stocks which are settled will be the first to rise and we will keep updated to you all. Dec will be biggest rally month. We will see 1000 1500 points rally for sure. In any case in last 30 years there were only 4 precedences where Oct and Nov had seen sharp corrections and in all the 4 occasions there was massive rally in Dec.

For me market follows valuation matrix though sometime due overbought conditions they behave like extremist. 11% correction was at 23500 and 200 Dma also was 23500. 100 point here and there market bottomed out.

We were reading (also reproduced) in Chakry comments that 23500 was the base case of operators who control the market and they had given reason of 23500 as 10 years average. Here is the catch like charts. You can follow 5 years 10 years 20 years and 33 years. We follow 33 years and operators followed 10 years hence they cut all their shorts at 23500. This is law of convenience. Next time when they are doing bull case scenario they will take may be 20 years or 33 years average. This we had also seen in media report of 147% to market capitalization to gdp ratio. Media lost its credibility. Analysts are paid so whom would you trust.

"As mentioned in our Diwali report new stocks are added into fno which will drive the volume and overall broader markets. Our key base level has been tested at 23500 (19.5 times fwd in line with 10 years average). Results season is also over and hoping for some recovery from current levels unless some negative surprise comes from global markets. Reversal of dxy from the resistance of 107 levels will resume FII buying".

Why 33 years not 10 years average is accurate tool. Indian economy opened in 1991 and it is 33 long years give a true mechanism to find out the average PE which was 25. Why they took 10 years. At 10 years average pe was below 20 and at 23500 training one year forward pr was also 19.5 hence a perfect match. In Jan 2021 we had 38.9 pe why? If 19 is the correct pe then why markets were giving 39 pe. Thus it is clear that at 86000 euphoria was created and 15 crs nee investors were long left right center and hence ignore F M and Sebi warnings. Who knows ministry must have had word with market participants to allow some cool off and 11% us mostly done. Another analyst today only posted on tweeter that Nifty is 5.5% discount to 15 years average. So you can understand how fluid is this concept.

Yesterday Sensex fell by 1200 points but best part is that all stocks under bear attack in Oct Nov were up on the expiry day. E g bhel which went down to Rs 220 closed at Rs 254 and SAIL which gone down to 108 closed at 117. Sbi was settled around Rs 840 though had seen 762 low on adani issue. Bhel SAIL Tata Motors Tata Powers Hdfc Bank and Sbi will remain in action in entire Dec. I will not be surprised if BHEL cross 300 in Dec and Sbi 912. Others will also follow. Hdfc bank saw a placement of 17 cr shares in msci. Had Jr not placement HDFC BANK shares would have rose 50% in a single day. Rs 11000 crs v wap selling but not in stocks like bhel sail tapo etc and it is confirmed now that last die hard attempt was made to save their skin by selling tech stocks which resulted in 1200 points down in Sensex.

Generally 20 lacs Nifty gets rolled over in a day yesterday it was exceptional day where we saw 50 lacs Nifty got rollover over and this was at the cost of Rs 12000 crs v wap selling. On Thursday fpi cut 17000 contracts short and dii cut 9000 contracts whereas pro shorted 32000 contracts. Either pro shorts pure shorts or shifting of fpi to pro as many work hands in glove. Fact remains fpi are short 1.18 lac contracts and pro 53 k contracts. O i reached from 70 lacs to 120 lacs which clearly suggest long bets are created. Every day you find out new mechanism to analyze markets they will bring 10 new methods to manipulate. No one can bring any manipulator to book. So please bear and carry.

Thumb rule all bearish talks rest in peace once the settlement is done. In zero sum game you will have a start new settlement afresh AND this time with 75 lot size of Nifty. Before split it was 50 so not a big deal. 50 was acceptable then why not 75. But you have 45 new babies to fondle with including Yes Bank.

Why big companies announce buy back? If rewarding investor is an issues they can announce same amount as special dividend. What we understand is that money lies in their balance sheet and only way to accommodate the float is buyback. Float could be part of deal with operators to support prices. Similarly MSCI placement is also part of this as no major price movements are seen even though inflow are over 2 bn \$.

yesterday also seen a headline in ET that 20% should be invested in US. What the hell they are talking. All bull shit. At 29000 Dow they were talking 30% correction and at 45000 20% investment. Dow P E is 32 whereas Nifty p e is just 20. Between USA and India everyone will agree that India is fast growing. No doubt US economy is too big and tr \$ investment also can't move thier markets whereas similar kind of investment can take Indian markets up by 100%.

One is thing is certain all brokers follow only thumb rule that is issue reports seeing flows. No one was bullish in bhel at Rs 45. There are hundreds of cases where reports come at the peak time. So what should you do? Choice is always yours whether follow them and earn 10 20% on some cases and lose in maximum or follow our own bottom up approach where earn 100% and lose in few that too time being.

We at CNI have a specific approach. Colgate we covered at 1300 now 3000+ we do not claim credits. We covered Siemens at 450 now Rs 7200. We do not chase these stocks now as they cannot become multi baggers. We at CNI always focus on multi baggers. Some stocks have become multi baggers very fast some will take time. Arihant Foundation AK Spintex were quick bugs. Global offshore emerged as biggest turnaround story. Wait till March 26 numbers you too will agree that it will regain it's lost glory. Riba rocked with high volumes where price and volume break out came. Now stock is in new territory. Bangala crisis is biggest plus for this stock. Even Walmart heard issuing big orders since they are not getting supplies from Bangala Desh.

We repeat semiconductor is next buzz in India AND it will be bigger than E V. India will become no 1 semiconductor hub replacing Taiwan and China. The importance of semiconductor is explained in such way that next W W III will be only with the help of chips which is not possible without semiconductor. Without tin semiconductor is impossible hence companies like Shetron and Hindustan tin have unimaginable future. Undoubtedly operators are trying to squeeze you so that you can exit then he starts the game.

India Gdp has direct nexus with packaging which is never appreciated by street. It is like banking in 2000. Now banking is getting 15 20 pe. India aim 800 bn \$ exports by 2030 from current 44 bn\$. The question is how? You require port infrastructure which of late started getting multiplied. Then comes transport which I suppose we are well equipped. Now comes packing. Here we feel rdb rasayan embbi national plastic technology and Hitech Corporation have big role to play. We will enlighten too much as only time will tell you the demand and consequential stock price. Hidden gems cannot remain hidden forever. We covered rdb realty at 34 no one liked it now 500. Also heard QIP is planned at 50% premium to current market price where WHO's WHO will buy like WINDSOR which rose from Rs 34 to 340. It was CNI find. Make due diligence because

The day is not too far where big hni investors will start accumulating packaging companies more particularly which have given extra ordinary results and trading below p e of 10 12.

There is nothing to write on valuations as sentiments decide the market. Some market drivers decided to have a correction market saw correction. Now they have started talking 30000 so 30000 will come soon. They will justify even 30000 then and we will have the last laugh.

Stay blessed, stay invested and follow disciplined trading and investment because money is yours so risk is also yours. If you follow bad advice you will pay the price and of you follow good advice you will earn. You decide who is best in the industry. We are ready to help every member individually

CNI Publications, A/120, Gokul Arcade, Sahar Road, Vile Parle (East). Mumbai- 400 057. PH.022- 28220323 / 28383889, Fax- 022-28242220
